SUMMARY

Artificial Intelligence and Machine Learning student with hands-on experience in developing AI-powered applications, machine learning systems, computer vision, NLP, and full-stack solutions. Skilled in Python, FastAPI, Flask, React, databases, and AI/LLM integrations, with practical experience building and deploying real-world projects.

EDUCATION

Alva's Institute of Engineering & Technology, Mijar, Moodbidri

2023 – Present

B.E. in Artificial Intelligence and Machine Learning

EXPERIENCE

Machine Learning Intern – Zephvion Pvt. Ltd.

Feb 2026 – Jun 2026

Python, Machine Learning, AI/LLM Integrations, APIs, Model Optimization

- Worked on real-world machine learning projects focused on building and improving AI-driven solutions in fast-paced development environments.
- Built, trained, and optimized machine learning models while working with datasets, APIs, and AI/LLM integrations to solve practical problems.

Machine Learning Intern – Cognifyz IT Solutions Pvt. Ltd.

Jun 2026 – Jul 2026

Machine Learning, Data Analysis, Data Cleaning, Dataset Processing

- Worked on machine learning tasks involving the collection, cleaning, interpretation, and analysis of datasets.
- Analyzed complex datasets to identify patterns and derive meaningful insights for data-driven problem solving.

PROJECTS

CrashGuard AI – AI Accident Detection & Emergency Response | JAGRUTHI 2024 – 1st Place

Python, Computer Vision, IoT Sensors, GPS, Camera Module, Flask

- Developed an AI-powered accident detection system using CV and IoT sensors to identify road accidents in real time.
- Integrated GPS-based location tracking to detect accident locations and support faster emergency response.
- Secured **1st Place** at the **JAGRUTHI 2024 Safety Hackathon** for developing an innovative accident detection and emergency response solution.

Astra – AI-Driven Crime Analytics & Visualization Platform | Karnataka State Police Datathon 2026

AI/ML, Predictive Analytics, Geospatial Mapping, Zoho Catalyst, Data Visualization

- Developed an AI-driven crime analytics platform integrating geospatial crime mapping, hotspot detection, and interactive dashboards.
- Implemented predictive risk scoring, anomaly detection, criminal network analysis, and repeat-offender tracking to support proactive investigations.
- Built the prototype using Zoho Catalyst services, including AppSail, Catalyst Functions, Data Store, Authentication, and Zia AI/ML.

Smart Campus AI System | Avinya Techknows Hackathon – Top 5 Finalist

Python, Flask, SQLAlchemy, JavaScript, HTML, CSS, Computer Vision

- Developed a centralized campus management platform integrating attendance, payments, and student services.
- Implemented an AI-powered face recognition attendance system using computer vision for automated student attendance.
- Built QR-based digital wallet payments and secured **Top 5 Finalist** recognition at the Avinya Techknows Hackathon, Bangalore.

Technical Skills

- **AI/ML & Data Analysis:** Python, NumPy, Pandas, Scikit-learn, TensorFlow (basics), Machine Learning Algorithms, Model Building & Evaluation, NLP, Computer Vision, LangChain, Google Gemini API, LLM
- **Languages:** Python, c, SQL
- **Frontend,Backend:** React.js, JavaScript, HTML, CSS, Node.js, FastAPI, Flask, REST APIs
- **Databases:** MySQL, MongoDB, PostgreSQL, Firebase, Supabase
- **Tools:** Git, GitHub, Docker, Kubernetes, N8N, Linux, Visual Studio Code
- **CS Fundamentals:** Data Structures & Algorithms, OOPs, DBMS, Computer Networks

CERTIFICATIONS

- **Google Cloud Data Analytics** – Google Cloud Career Launchpad
- **CodeChef** – Data Structures & Algorithms
- **Anthropic MCP**
- **Artificial Intelligence** – Infosys Springboard

ACHIEVEMENTS

- **Winner (1st Place)** – JAGRUTHI 2024 Safety Hackathon organized by BACCE Foundation & OHSSA1.
- Participated in a Hackathon organized by **Alva's Institute of Engineering & Technology** in association with Avinya Techknows, Bangalore.
- Participated in **Ideathon 2025**, a National Level Idea Pitching Contest held at Bangalore Institute of Technology.
